DETAILED ACTION

Acknowledgment

1. This Office Action is responsive to the Amendment filed on 8/24/2007. Accordingly, claims 17-22 and 31-36 are pending in this application.

Claim Rejections - 35 USC § 112

2. Claims 32 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of claim 32 is vague and indefinite because when taking the combination of claims 31 and 32 together, it is unclear of how the limitation of "except for ... data packet" recited in claim 31, lines 5-7 is to be carried out since there is now only one bad control word to determine becoming unsynchronized.

That is, how the synchronized data packet can separate one bad control word?

Similar problem exists for the recitation of claim 35.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2611

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 17-22 and 31-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Hashemi et al (US 6,064,679).

Regarding claims 17-22, Hashemi, as shown in figure 3, teaches a method for word synchronization between the plurality of word devices (300) connected by serial lines (310) comprising requesting synchronization when the word device (300) is inserted into the hub loop and performing the synchronization process so that the newly connected word device (300) can communicate with other word devices (300) in the hub loop. See also column 5, line 25 to column 7, line 7.

Regarding claims 31-36, Hashemi also teaches detecting loss of word synchronization whenever there are a number of bad control words being received. See column 7, lines 7-14.

Response to Arguments

5. Applicant's arguments with respect to claims 17-22 and 31-36 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Gindi (US 4,042,783) and Henson et al (US

Application/Control Number: 09/418,119

Art Unit: 2611

6,157,652) are cited because they are pertinent to the method of word synchronization

Page 4

and detecting loss of synchronization.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to DON N. VO whose telephone number is (571) 272-

3018. The examiner can normally be reached on Mon-Fri (9:00AM - 6:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, MOHAMMAD GHAYOUR can be reached on (571) 272-3021. The fax

phone number for the organization where this application or proceeding is assigned is

571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
